Braille · character & chord reference

A4 · 2 pages · layout glm-5.3-flash
data: verified research YAMLs · UEB 1 / UEB 2 / Computer 8

One box = one braille cell = one chord. Sequences read left → right; the SPACE chip is the blank cell (Braille-space key).

Cell numbering: dots 1·2·3 run down the left column, 4·5·6 down the right. Rose dots 7·8 belong to 8-dot keys only.

SPACE + cell means one simultaneous chord with Braille Space; Tab = Space + dots 2345 (0x11e). Source: Mac VoiceOver, support.apple.com/en-us/103560.
Sticky: next host key or 1 s unused timeout. Command + Left/Right = line start/end; Shift + Tab = previous UI item. Globe ≠ Fn.
Skipped defaults: Caps Lock, F1–F12, brightness, Mission Control, Spotlight, previous/next track, system mute – no sourced chord in project references; Settings entry deferred.
